

CELLULAR BLINDS

The Cellular Blind incorporates a multi-cell blanket of non-woven fabric made of polyester fibre, with a headrail & bottom rail. It is an internal product which is available as a Sheer, Light Filtering, Semi Opaque or Room Darkening fabric, depending on the cell size and application chosen.

They have excellent insulation properties which keeps a room warm in winter & cool in summer. Polyester fibre ensures material will not degrade over time. Cellular Blinds are available in a number of operating systems, including Corded, Cordless, Day & Night, Side Guided & SmartFit for skylights. Specialty shapes & vertical options are available to give you the optimal light and privacy control you desire.

Their Aluminium headrail and bottom rail, come in a variety of colour options. They are available in a range of single or double cell sizes to suit décor and application. There are special colour ranges available for Sheer, Light Filtering, Semi Opaque & Designer. Blanket widths are available in 25mm, 35mm or 45mm sizes (when stacked flat).

“ A simple way to make your home more energy efficient as well as environmentally friendly is to invest in Cellular Blinds. Cellular Blinds come in a variety of styles & designs, so you do not have to sacrifice a beautiful decor when you get your blinds. ”
