

FLY SCREENS

Fly Screens for windows & doors come in a variety of meshes which include; Stainless Steel Mesh, Ultra Mesh & Paw Proof Mesh. Window Fly Screens are available in 9mm and 11mm frames.

Fly Screens are pre-treated, powdercoated black, have a PVC coating and are UV stabilised for longevity. They boast the longest outdoor life of any mesh for your doors and windows.

RETRACTABLE PLEATED SCREENS

These screens are unique, strong and made of durable mesh. They span up to 9000mm wide (with 2 screens). They only require a 30mm reveal depth. Retractable Pleated Screens are stronger and more durable than flat screen mesh. They have an advanced European design system. These screens are manufactured in Australia.

Standard Colours – White, Clear Anodised, Black, Birch White. Custom Colours are also available.

“ Fly Screens have long been a staple of many Australian households. There are a number of benefits that Fly Screens can provide to any household, which makes them both a popular and necessary choice for any modern home. ”
