

# FOLDING ARM AWNINGS

Aside from being aesthetically appealing in an outdoor space, Folding Arm Awnings are also extremely cost effective, versatile and easy to care for. They only require an occasional clean to keep them looking their best.

Folding Arm Awnings are not only reserved for use above windows and doors; these modern awnings can now be used to; shield an entire pool area or car space, create an outdoor dining and entertaining space, or even to extend the roof of your existing patio. With them you can create an outdoor area that shields against the sun or rain.

Folding Arm Awnings fold horizontally and are projected. When the awning is retracted, the space is free of any structure.

Folding Arm Awnings above a pool area can also help to protect your pool from external elements, such as a build-up of dry leaves and other debris. Motorised Folding Arm Awnings are your best option for easy operation.

“Awnings are cost effective, provide both privacy and sun protection and also add a stylish and contemporary outdoor finish to your home where space is at a premium.”
