

# PANEL BLINDS

For a touch of modern sophistication, Panel Blinds offer a contemporary take on traditional window fashions, featuring sleek lines and minimalist design. Panel Blinds evoke understated elegance in any home.

Panel Blinds open to the left, right or center, making them the ideal solution for sliding doors or large windows. When opened, the panels stack neatly behind each other, sliding them closed creates a complete fabric display used to control privacy and light filtering.

They are crafted from flat fabric panels attached to a simple headrail track system that uses glider mounted carriers, making it light and easy to operate.

Perhaps the best feature of the Panel Blind is the large amount of fabrics and colours that are available. Following the versatility of Roman Blinds, Panel Blinds can easily be designed to blend in with the overall theme of your home interior. They come in standard block out or screen materials, which are able to assist in the insulation of your home.

“Panel Blinds are a versatile and contemporary window treatment. Stack back the panels to enjoy your view or simply glide them across to attain complete privacy.”
