

ROLLER BLINDS

Roller Blind fabrics are designed specifically for strong sun and damaging ultra violet light, making them extremely durable and long lasting. Our fabric collection incorporates a vast array of sheer, translucent and blackout fabrics in both plain and textured finishes. Roller Blinds allow you to combine the functionality of two different fabrics in the one roller blind system, offering flexibility to adjust both light levels and night time privacy in the application.

You can complete the look of your Roller Blind with a selection of attractive trims, including scallop, fringe or braid.

MOTORISED ROLLER BLINDS

Motorised Roller Blinds combine the flexibility and convenience of automation for enhanced internal comfort and control.

Automation of the Roller Blind enables silent movement of the blind with a highly durable motor.

“ Roller Blinds are a practical and affordable window covering designed to enhance the mood you have created in your home. Roller Blinds can make a bold fashion statement or blend unobtrusively in any room. ”
