

ROMAN BLINDS

CLASSIC - sewn pockets to the rear of the blind.

PLANTATION - timber 1/2 round batten to the front & rectangular timber batten to the rear of the blind.

SEWLESS - aluminium batten to the rear of the blind.

MOTORISED - combine the flexibility & convenience of automation for enhanced internal comfort & control.

Our fabric collection incorporates a vast array of sheer, translucent and blockout fabrics in both plain and textured finish.

A stiff pelmet teamed with a Roman Blind can be an attractive & practical solution when a curtain is unsuitable and a blind alone may seem insufficient.

“ Roman Blinds can provide the soft feel of draperies while offering a controllable window covering that opens and closes easily. Their fabrics are designed specifically for strong sun & damaging ultra violet light, making them extremely durable and long lasting. ”
