

STRAIGHT DROP AWNINGS

The Straight Drop Awning is a cost & energy efficient full drop (bottom roll up) blind which uses an external rope & pulley operation. Both manual & motorised options ensure smooth operation of your awning.

They are perfect for enclosing verandas, pergolas, outdoor living areas and restaurants for privacy and weather protection. Straight Drop Awnings keep the sun off the house and lower the strain on air conditioners.

These awnings are designed to maximise the use of your outdoor areas all year round without creating a visual barrier. They prevent discomposure from droughts, wind and rain.

Drop Cord & Pulley Awnings provide a cost effective option to protect your environment from the elements.

These awnings are available in a Sunscreen Mesh, a PVC option or an Acrylic Canvas. With a number of hold down options available, these awnings can be matched to suit any home.

“Awnings retain their good looks and functionality for many years, and use a simple cord and pulley system to extend and retract. They work well as temporary partitions for outdoor areas and provide significant rain and temperature protection benefits.”
