

WINDOW GRILLES

Window Grilles are safety features that appear as protective metals in front of our windows. Grilles are available with a 7mm Diamond Grille.

Window Grilles are an effective physical barrier to burglars. It is also common for people to combine grilles with alarms or CCTV for better security in their homes.

Window Grilles also allow you to have light coming into your premises and good access to a clear outside view.

Window Grilles are available in Ultra Mesh, Paw Proof Mesh and Stainless Steel Mesh in a 9 or 11mm frame.

There is an extensive range of standard frame colours & frames that can be powdercoated to compliment your existing decor.

“ Window Grilles are very affordable and they are also easy to install. What's more, their simplicity also does not require them to have special permits for installation. ”
